

FCT::OldRenderGraph
::addWindowResource

FCT::Pass::setTarget

FCT::ImageRenderTarget
::depthStencilBuffer

```
graph LR; A[FCT::OldRenderGraph::addWindowResource] --> D[FCT::ImageRenderTarget::depthStencilBuffer]; B[FCT::Pass::setTarget] --> D;
```

The diagram illustrates two function calls pointing to a common target. On the left, two white rectangular boxes with black borders contain the text 'FCT::OldRenderGraph::addWindowResource' and 'FCT::Pass::setTarget'. On the right, a gray rectangular box with a black border contains the text 'FCT::ImageRenderTarget::depthStencilBuffer'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating a relationship or data flow between the functions and the target buffer.
