

FCT::BlendState::additive

FCT::BlendState::alpha

FCT::BlendState::multiply

FCT::BlendState::op

```
graph LR; A[FCT::BlendState::additive] --> D[FCT::BlendState::op]; B[FCT::BlendState::alpha] --> D; C[FCT::BlendState::multiply] --> D;
```

The diagram illustrates a mapping from three source identifiers to a single target identifier. On the left, three white rectangular boxes with black borders are stacked vertically. Each box contains a text label: 'FCT::BlendState::additive' at the top, 'FCT::BlendState::alpha' in the middle, and 'FCT::BlendState::multiply' at the bottom. On the right, there is a single gray rectangular box with a black border, containing the label 'FCT::BlendState::op'. Three blue arrows originate from the right side of each of the three white boxes and point towards the left side of the gray box, indicating a directed relationship or mapping from each source to the target.
