

FCT::RHI::VK_InputLayout
::create

FCT::VK_BlendState
::create

FCT::VK_Context::clear

```
graph LR; A[FCT::RHI::VK_InputLayout::create] --> C[FCT::VK_Context::clear]; B[FCT::VK_BlendState::create] --> C;
```

The diagram illustrates a control flow where two separate function calls, 'FCT::RHI::VK_InputLayout::create' and 'FCT::VK_BlendState::create', both point to a common target function, 'FCT::VK_Context::clear'. The source functions are in white boxes, and the target function is in a grey box. Blue arrows indicate the direction of the flow.
