

FCT::PixelLayout::getElement  
OffsetBySemantic

FCT::PixelLayout::getElement  
OffsetByType

FCT::PixelLayout::getElement  
Offset

```
graph LR; A[FCT::PixelLayout::getElementOffsetBySemantic] --> C[FCT::PixelLayout::getElementOffset]; B[FCT::PixelLayout::getElementOffsetByType] --> C;
```

The diagram illustrates a mapping from two specific methods to a common, more general method. On the left, there are two white rectangular boxes. The top box contains the text 'FCT::PixelLayout::getElementOffsetBySemantic' and the bottom box contains 'FCT::PixelLayout::getElementOffsetByType'. On the right, there is a gray rectangular box containing the text 'FCT::PixelLayout::getElementOffset'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both methods on the left are mapped to or implemented by the method on the right.
