

```
FCT::VertexShader::  
createBindedInputLayout
```

```
graph LR; A[FCT::VertexShader::createBindedInputLayout] --> B[FCT::RHI::InputLayout::create];
```

A diagram showing a function call. On the left, a white box with a black border contains the text 'FCT::VertexShader::createBindedInputLayout'. A blue arrow points from the right side of this box to the right side of a gray box with a black border on the right. The gray box contains the text 'FCT::RHI::InputLayout::create'.

```
FCT::RHI::InputLayout  
::create
```
