

FCT::ShaderGenerator
::generatePixelShader

FCT::ShaderGenerator
::generateVertexShader

FCT::ShaderGenerator
::generateShaderIn

```
graph LR; A[FCT::ShaderGenerator::generatePixelShader] --> C[FCT::ShaderGenerator::generateShaderIn]; B[FCT::ShaderGenerator::generateVertexShader] --> C;
```

The diagram illustrates a relationship between three functions. On the left, two white rectangular boxes with black borders contain the function signatures `FCT::ShaderGenerator::generatePixelShader` (top) and `FCT::ShaderGenerator::generateVertexShader` (bottom). On the right, a gray rectangular box with a black border contains the function signature `FCT::ShaderGenerator::generateShaderIn`. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both `generatePixelShader` and `generateVertexShader` are related to or perhaps call `generateShaderIn`.
