

FCT::Context::loadTexture

FCT::SingleBufferImage
::resize

FCT::SingleBufferImage::as

```
graph LR; A[FCT::Context::loadTexture] --> C[FCT::SingleBufferImage::as]; B[FCT::SingleBufferImage::resize] --> C;
```

The diagram illustrates a dependency or call relationship. Two source functions, 'FCT::Context::loadTexture' and 'FCT::SingleBufferImage::resize', are shown in white boxes on the left. Blue arrows point from each of these boxes to a single target box on the right, 'FCT::SingleBufferImage::as', which has a gray background. This suggests that both source functions interact with or call the target function.
