

FCT::TokenGraph::addNode

FCT::TokenGraph::updateNode

FCT::TokenGraph::addNode

```
graph LR; A[FCT::TokenGraph::addNode] --> C[FCT::TokenGraph::addNode]; B[FCT::TokenGraph::updateNode] --> C;
```

The diagram illustrates a mapping or transformation. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'FCT::TokenGraph::addNode' and the bottom box contains 'FCT::TokenGraph::updateNode'. On the right, there is a single gray rectangular box with a black border containing the text 'FCT::TokenGraph::addNode'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box. The top arrow starts from the 'FCT::TokenGraph::addNode' box, and the bottom arrow starts from the 'FCT::TokenGraph::updateNode' box. Both arrows converge on the gray box, indicating that both source functions are mapped to the target function.
