

FCT::DynamicMesh::addIndex

FCT::DynamicMesh::addIndices

FCT::DynamicMesh::resize
IndexBuffer

```
graph LR; A[FCT::DynamicMesh::addIndex] --> C[FCT::DynamicMesh::resize<br/>IndexBuffer]; B[FCT::DynamicMesh::addIndices] --> C;
```

The diagram illustrates a relationship between three code elements. On the left, two white rectangular boxes with black borders contain the function names 'FCT::DynamicMesh::addIndex' (top) and 'FCT::DynamicMesh::addIndices' (bottom). On the right, a gray rectangular box with a black border contains the text 'FCT::DynamicMesh::resize' followed by 'IndexBuffer' on a new line. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'addIndex' and 'addIndices' functions interact with or call the 'resize' method of the 'IndexBuffer'.
