

FCT::VertexPath::closePath

```
graph LR; A[FCT::VertexPath::closePath] --> B[FCT::VertexPath::lineTo]; B --> C[FCT::VertexPath::updateBounds];
```

The diagram illustrates a sequence of three method calls on the FCT::VertexPath object. The first method, closePath, is highlighted with a gray background. It is followed by lineTo, which has a white background. The final method in the sequence is updateBounds, also with a white background. Blue arrows indicate the flow from one method to the next in a linear sequence.

FCT::VertexPath::lineTo

FCT::VertexPath::updateBounds
