

`FCT::Vec4::normalize`

`FCT::Vec4::operator-`

`FCT::Vec4::operator-`

`FCT::Vec4::Vec4`

```
graph LR; A[FCT::Vec4::normalize] --> D[FCT::Vec4::Vec4]; B[FCT::Vec4::operator-] --> D; C[FCT::Vec4::operator-] --> D;
```

The diagram illustrates three functions on the left, each in a white box with a black border, pointing via blue arrows to a single gray box on the right. The functions are `FCT::Vec4::normalize`, `FCT::Vec4::operator-`, and `FCT::Vec4::operator-`. The target box is `FCT::Vec4::Vec4`.
