

FCT::Runtime::createWindow

FCT::Runtime::createWindow

FCT::Window::create

```
graph LR; A[FCT::Runtime::createWindow] --> C[FCT::Window::create]; B[FCT::Runtime::createWindow] --> C;
```

The diagram illustrates two separate calls to the function `FCT::Runtime::createWindow` on the left. Each call is represented by a white rectangular box with a black border. Two blue arrows originate from the right side of these boxes and point towards a single gray rectangular box with a black border on the right. This gray box contains the text `FCT::Window::create`, indicating that both calls from the runtime module result in the same window creation function being executed.
